MY NAME IS ED MONAHAN

- I'm a moderate-conservative-independent political type.
- I'm supporting . . .

K E N G I B S O N

. . . for Mayor of Newark in the
May 1970 election.

- Ken needs your support, and this short personal testimony to
Ken is by way of an introduction:

Ken Gibson is a former student of mine, although I'm 38 and Ken is 37. I'm an associate professor of civil engineering at Newark College of Engineering. Because our careers developed together, I came to know Ken as a friend, as a quietly competent honors student, and as a sensitive and ethical human being.

Please meet Ken Gibson and learn of his views and aspirations.
That's all we ask. The invitation is on the reverse side.
